DKI Jakarta, Indonesia

SUMMARY

Enthusiastic and driven third-year medical student at Universitas Trisakti with a proven track record of leadership, research, and community engagement. As a former member of the Student Parliament (PMFK) and the Asian Medical Student Association (AMSA), I have successfully managed and executed large-scale events—including the Final General Session of the USAKTI FK Parliament—and coordinated regional student exchange programs. My scientific inquiry is demonstrated by multiple poster competition accolades (2nd place in PCC AMSC 2025, top-10 finalist at IMSTC 2024) and finalist status in pediatric blood-disorder research at AMSA-UAJ 2024. A finalist in the Outstanding Student (PILMAPRES) selection, I have also contributed to public health through campaigns like “Crack a Smile” hand-washing initiatives and elder-care outreach. I bring strong skills in teamwork, communication, leadership, and time management, and I am fluent in English, with a passion for translating research into better patient outcomes.
